Vignesh B

Full-Stack Flutter Developer

+91 96552 16725 vigneshb7999@gmail.com linkedin.com/in/vigneshb7999

Professional Summary

Results-driven Full-Stack Flutter Developer with 3 years of experience building scalable, cross-platform mobile and web applications. Skilled in Flutter (BLoC pattern), Node.js, and DevOps tools including Grafana, Loki, Kafka, and Nginx. Adept at architecting modular codebases, managing multi-flavor builds, and integrating real-time notification and mapping systems to deliver high-performance user experiences.

Education

Bachelor of Science in Computer Technology 2016 - 2019
Dr.N.G.P. Arts and Science College, Coimbatore, Tamil Nadu

Key Projects

Community Commerce App (Flutter)

- **Architecture:** Built with **Flutter and the BLoC pattern** for modular, scalable, and maintainable code separation across multiple modules (community, store, and customer apps).
- **Multi-App Ecosystem:** Generated separate store and community applications from a single shared Flutter codebase, efficiently managing logic, assets, and environment configurations for each variant.
- **Push Notifications:** Integrated **Firebase Cloud Messaging** with image-rich promotional notifications and targeted campaigns to enhance user engagement and local marketing reach.
- **Community Integration:** Enabled community-driven interactions by connecting stores, service providers, and event organizers with customers, fostering localized commerce and employment opportunities.
- **Performance & Maintenance:** Structured environment-based configuration handling to ensure seamless updates, simplified debugging, and faster release cycles.

EK-Bharath Delivery Platform (Flutter)

- **Smart Geo-Mapping:** Implemented **H3-based clustering** to visualize and analyze delivery performance through hexagonal grid mapping, improving efficiency in order grouping and route optimization.
- **Order Automation:** Built an **OCR-powered order creation feature** that scans receipts to automatically extract address and order details, reducing manual input and operational time.
- **Native Integration:** Established a **custom method channel to handle background location tracking** efficiently in native Android, ensuring accurate delivery partner positioning and smooth real-time updates.
- **Enhanced User Engagement:** Integrated **image-rich notifications** in the delivery partner app to improve communication, incentives, and user experience.
- **Scalability:** Designed a modular system capable of managing large-scale logistics data while maintaining high app performance and reliability.

Professional Experience

Addlogs Technology Pvt Ltd — Community Commerce Project (Flutter) 3 YEARS — PRESENT

- Engineered and maintained a robust Flutter architecture leveraging the BLoC pattern and Flutter Flavors for modular, multi-app scalability.
- Synchronized Firebase Cloud Messaging with rich media notifications to boost engagement and marketing reach.
- Partnered with backend teams to refine API communication, minimize latency, and maximize performance.
- Streamlined deployment pipelines by automating environment configurations, elevating release efficiency and reliability.

Addlogs Technology Pvt Ltd — EK-Bharath Project (Flutter)

- Utilized H3-based clustering to enhance performance and streamline monitoring with a hexagonal grid system.
- Built an OCR-powered order creation feature to scan receipts, extract address and order details, and automate workflow generation.
- Establish a custom method channel to efficiently manage background location tracking in native.

Hard Skills

Mobile Development
Flutter, Dart, Android, iOS, REST APIs, Firebase, State Management (Provider, Bloc), Pub.dev, Notifications, Method Channel, H3-Hexagon, Unit Testing

Web Development (Angular)
HTML, CSS, TypeScript, Bootstrap, REST APIs, Standalone Components, One-Way & Two-Way Binding, NPM Packages, SFTP

DevOps
Nginx, Ubuntu Service, PM2, MySQL, Apache Kafka, Redis, AWS Redshift, Grafana, Loki, Prometheus, Promtail, Node Exporter, Log Management, API Latency

Other Tools
Ollama, N8N, Hugging Face, Google Colab, Illustrator, Photoshop, Figma, QGIS, Rive Animation

Soft Skills

Agile Development & Project Management
Experienced in Agile and Scrum practices using Jira for sprint planning, task tracking, and backlog management — ensuring efficient teamwork, transparency, and timely delivery.

Bitbucket & Version Control
Proficient in Git workflows with Bitbucket — managing branches, performing code reviews, handling pull requests, and maintaining structured repositories for smooth collaboration.

Additional Information

Languages Known
Tamil (Native), English (Professional Proficiency)
